

Sending a photograph to your child’s teacher

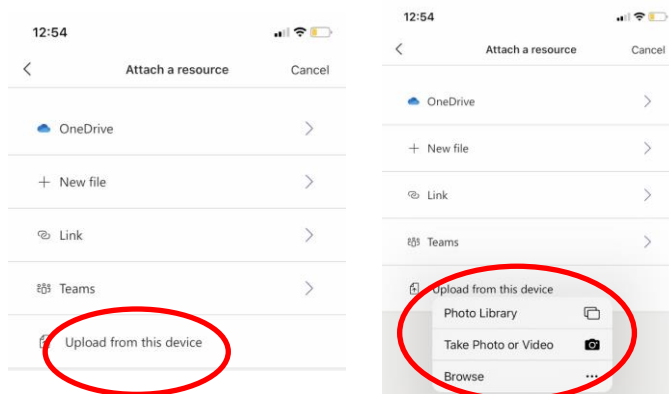

Although being able to edit work set by the teacher is the most useful way to share your child’s learning, we are aware that for some this has been a challenge. If you are unable to edit the work directly on to Teams and need to send a photograph to your child’s teacher please do it this way.

On the app

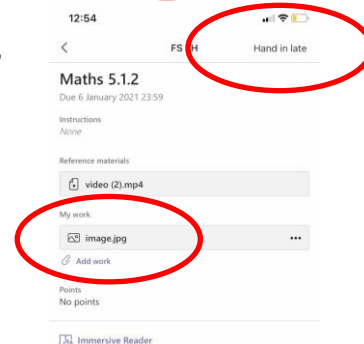

1. Choose the assignment your child is working on and click ‘add work’

2. Choose ‘upload from this device’ and either take a photo or choose one from the phones photo album

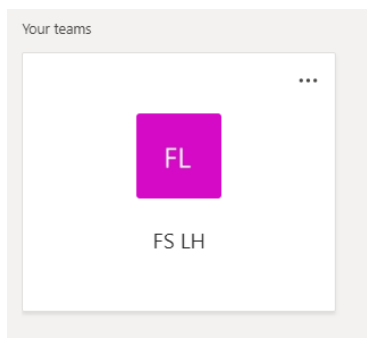

3. You will see it has been attached and be able to click ‘hand in’ to send it to your child’s teacher

On a laptop

1. Open the Team (you child's class)

2. Go to the assignment your child is working on and click 'add work'

3. Click 'upload from this device'

4. Search for the picture you need to upload. You can also upload a word document your child might have worked on if they were unable to edit the copy sent by the teacher. Editing the copy sent by the teacher is the preferred option, this is only if it is not working. Press open and then press done.
